MAD. GEORGE BRUANT.

**NEW HARDY YELLOW CLIMBING ROSE.****YELLOW RAMBLER—(Aglaia).**

The following is the description given by the introducer of this grand novelty in hardy climbing roses:

This rose is, we are confident, an even more valuable introduction than the Crimson Rambler, for it is the hardiest yellow climbing rose yet introduced, and the quality of hardiness has been an extremely difficult one to combine with yellow color. It has withstood unprotected and without injury a prolonged temperature of from zero to two degrees below, and we believe that, with very slight attention, it can be grown everywhere that other roses succeed.

YELLOW RAMBLER (AGLAIA.)

The Yellow Rambler is a seedling of the "Japanese Polyantha Sarmentosa," crossed with pollen of the Noisette "Reve d'Or." This polyantha was undoubtedly a progenitor of the Crimson Rambler, and the Yellow Rambler is therefore a blood relation to the Crimson Rambler, which it much resembles in growth and foliage. It also blooms after the same manner as Crimson Rambler, in large trusses, often as many as 120 to 150 flowers in a bunch. The flowers are very fragrant, a quality not possessed by the Crimson Rambler, and last three to four weeks without fading. The plant is a very vigorous grower, making shoots 8 to 10 feet high in one season after becoming well established.

Strong, 2½-inch pot plants. 75c. each; \$7.00 per 10; \$50.00 per 100.
